

\$COD TOKEN
WHITEPAPER

COUNCIL OF DOGS

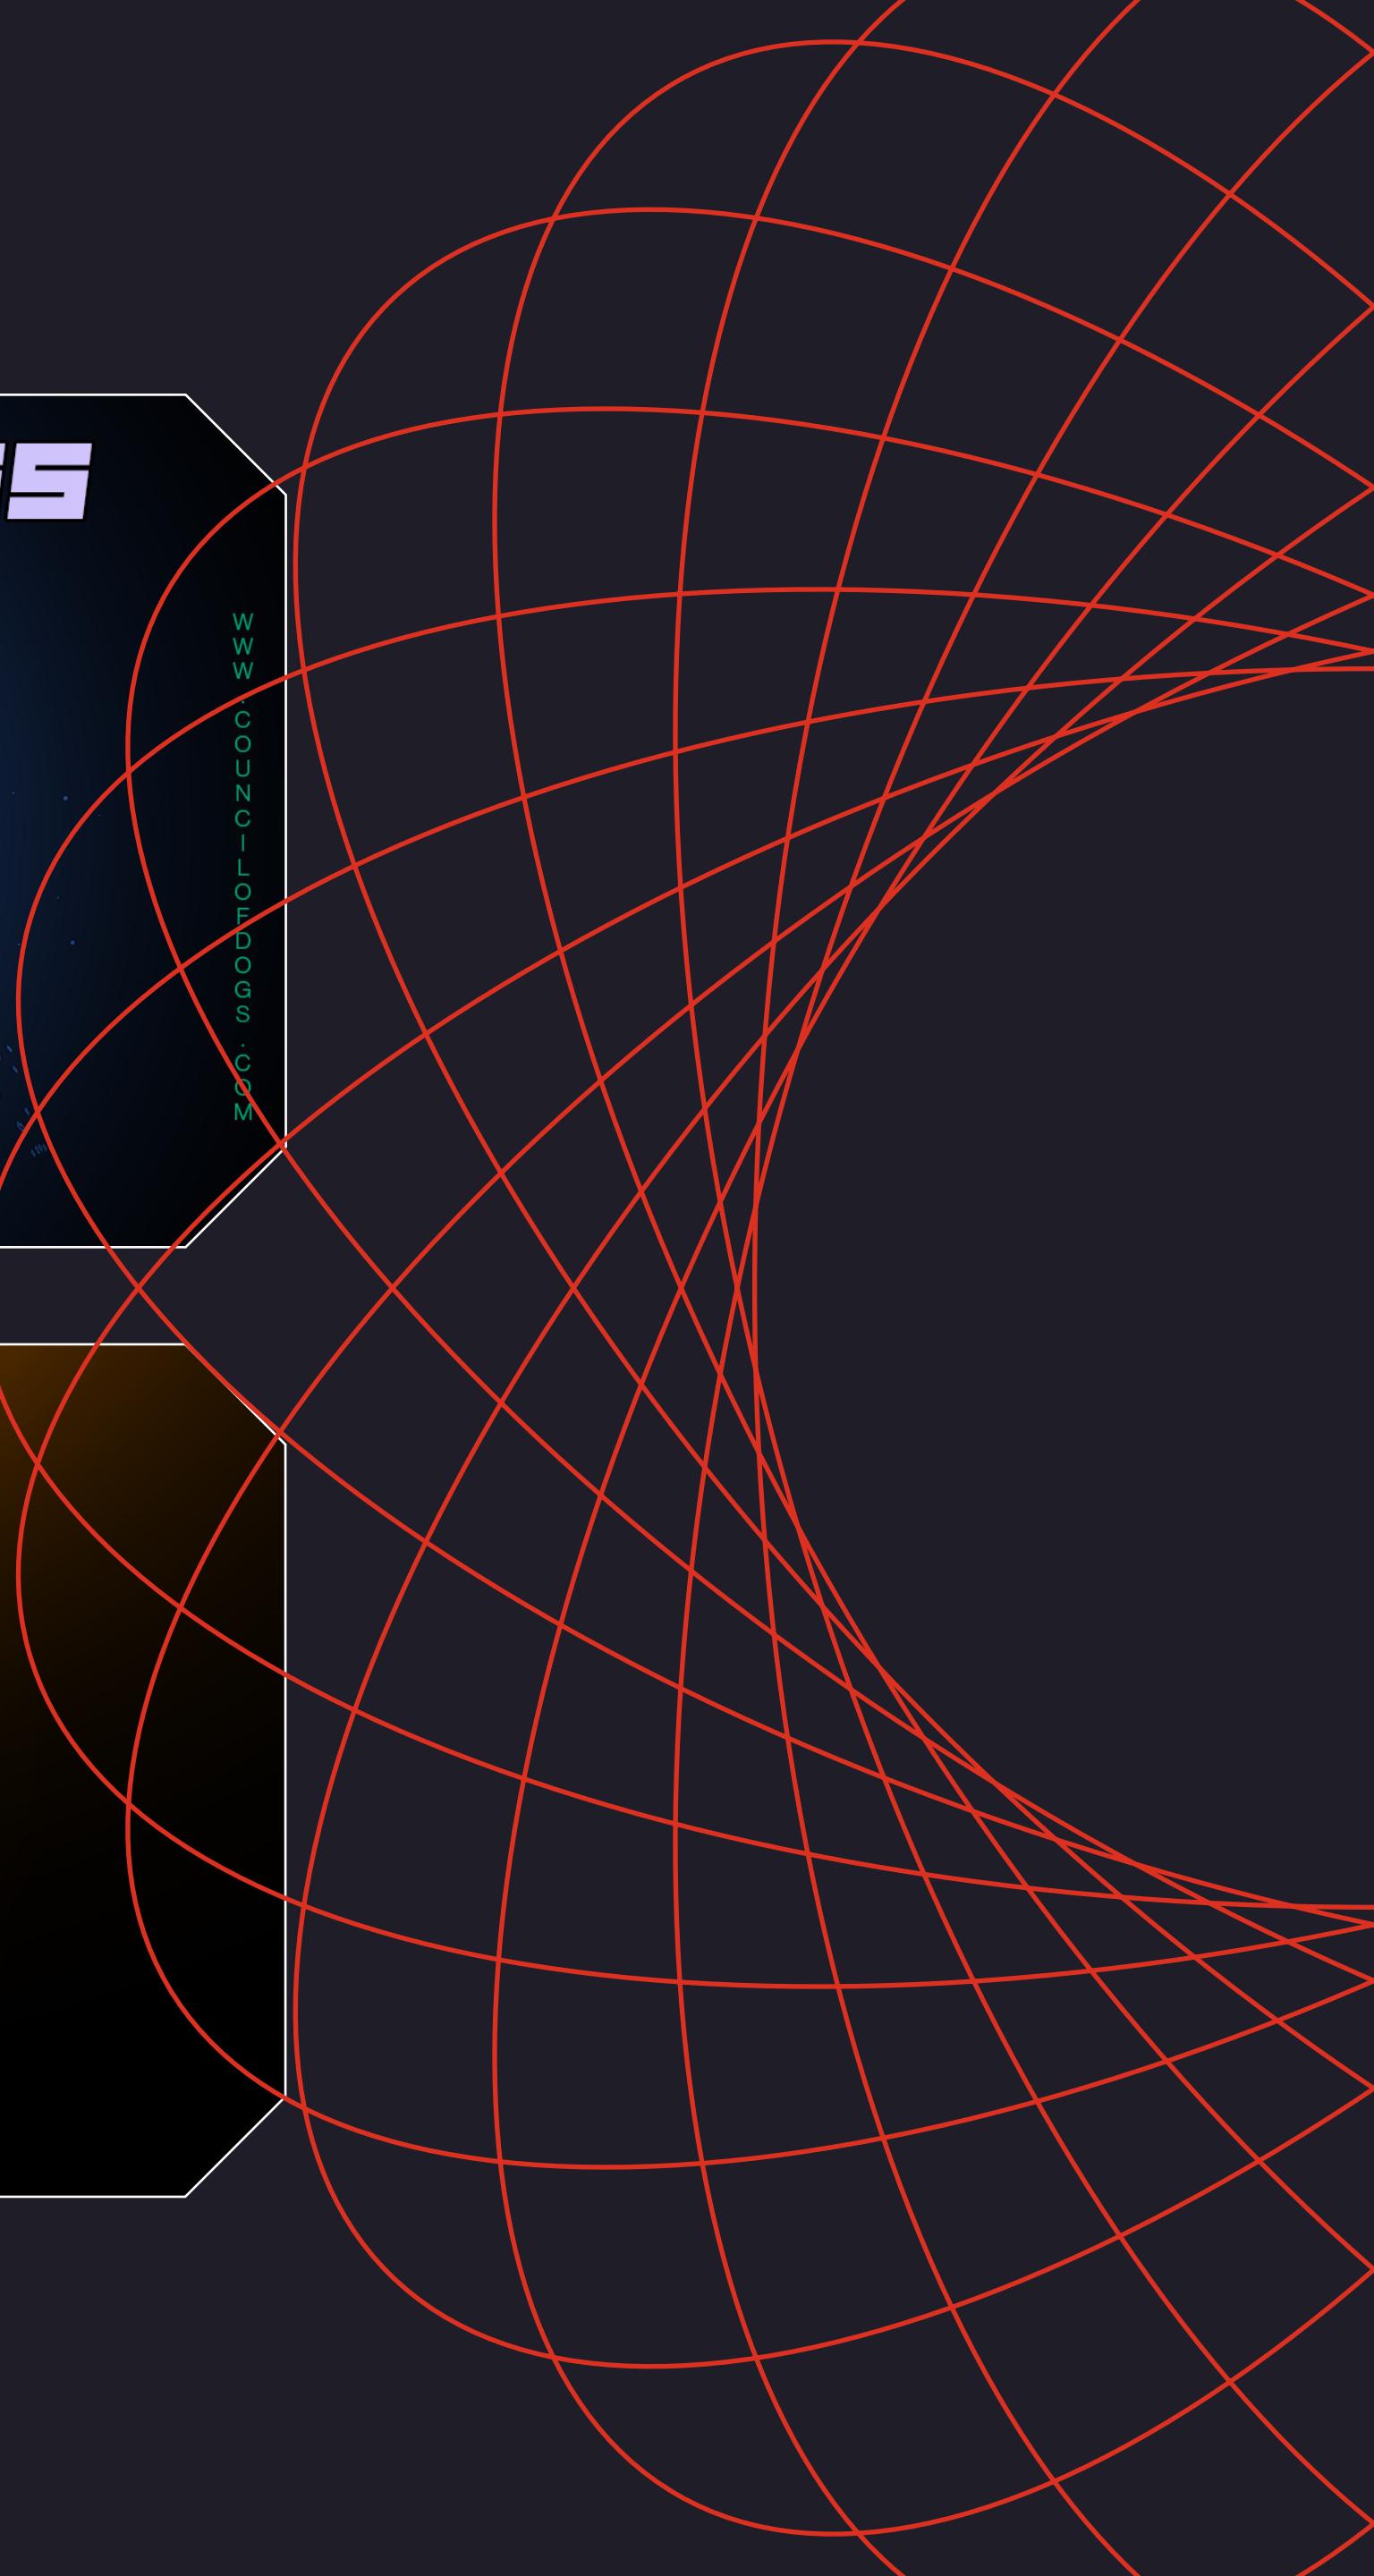

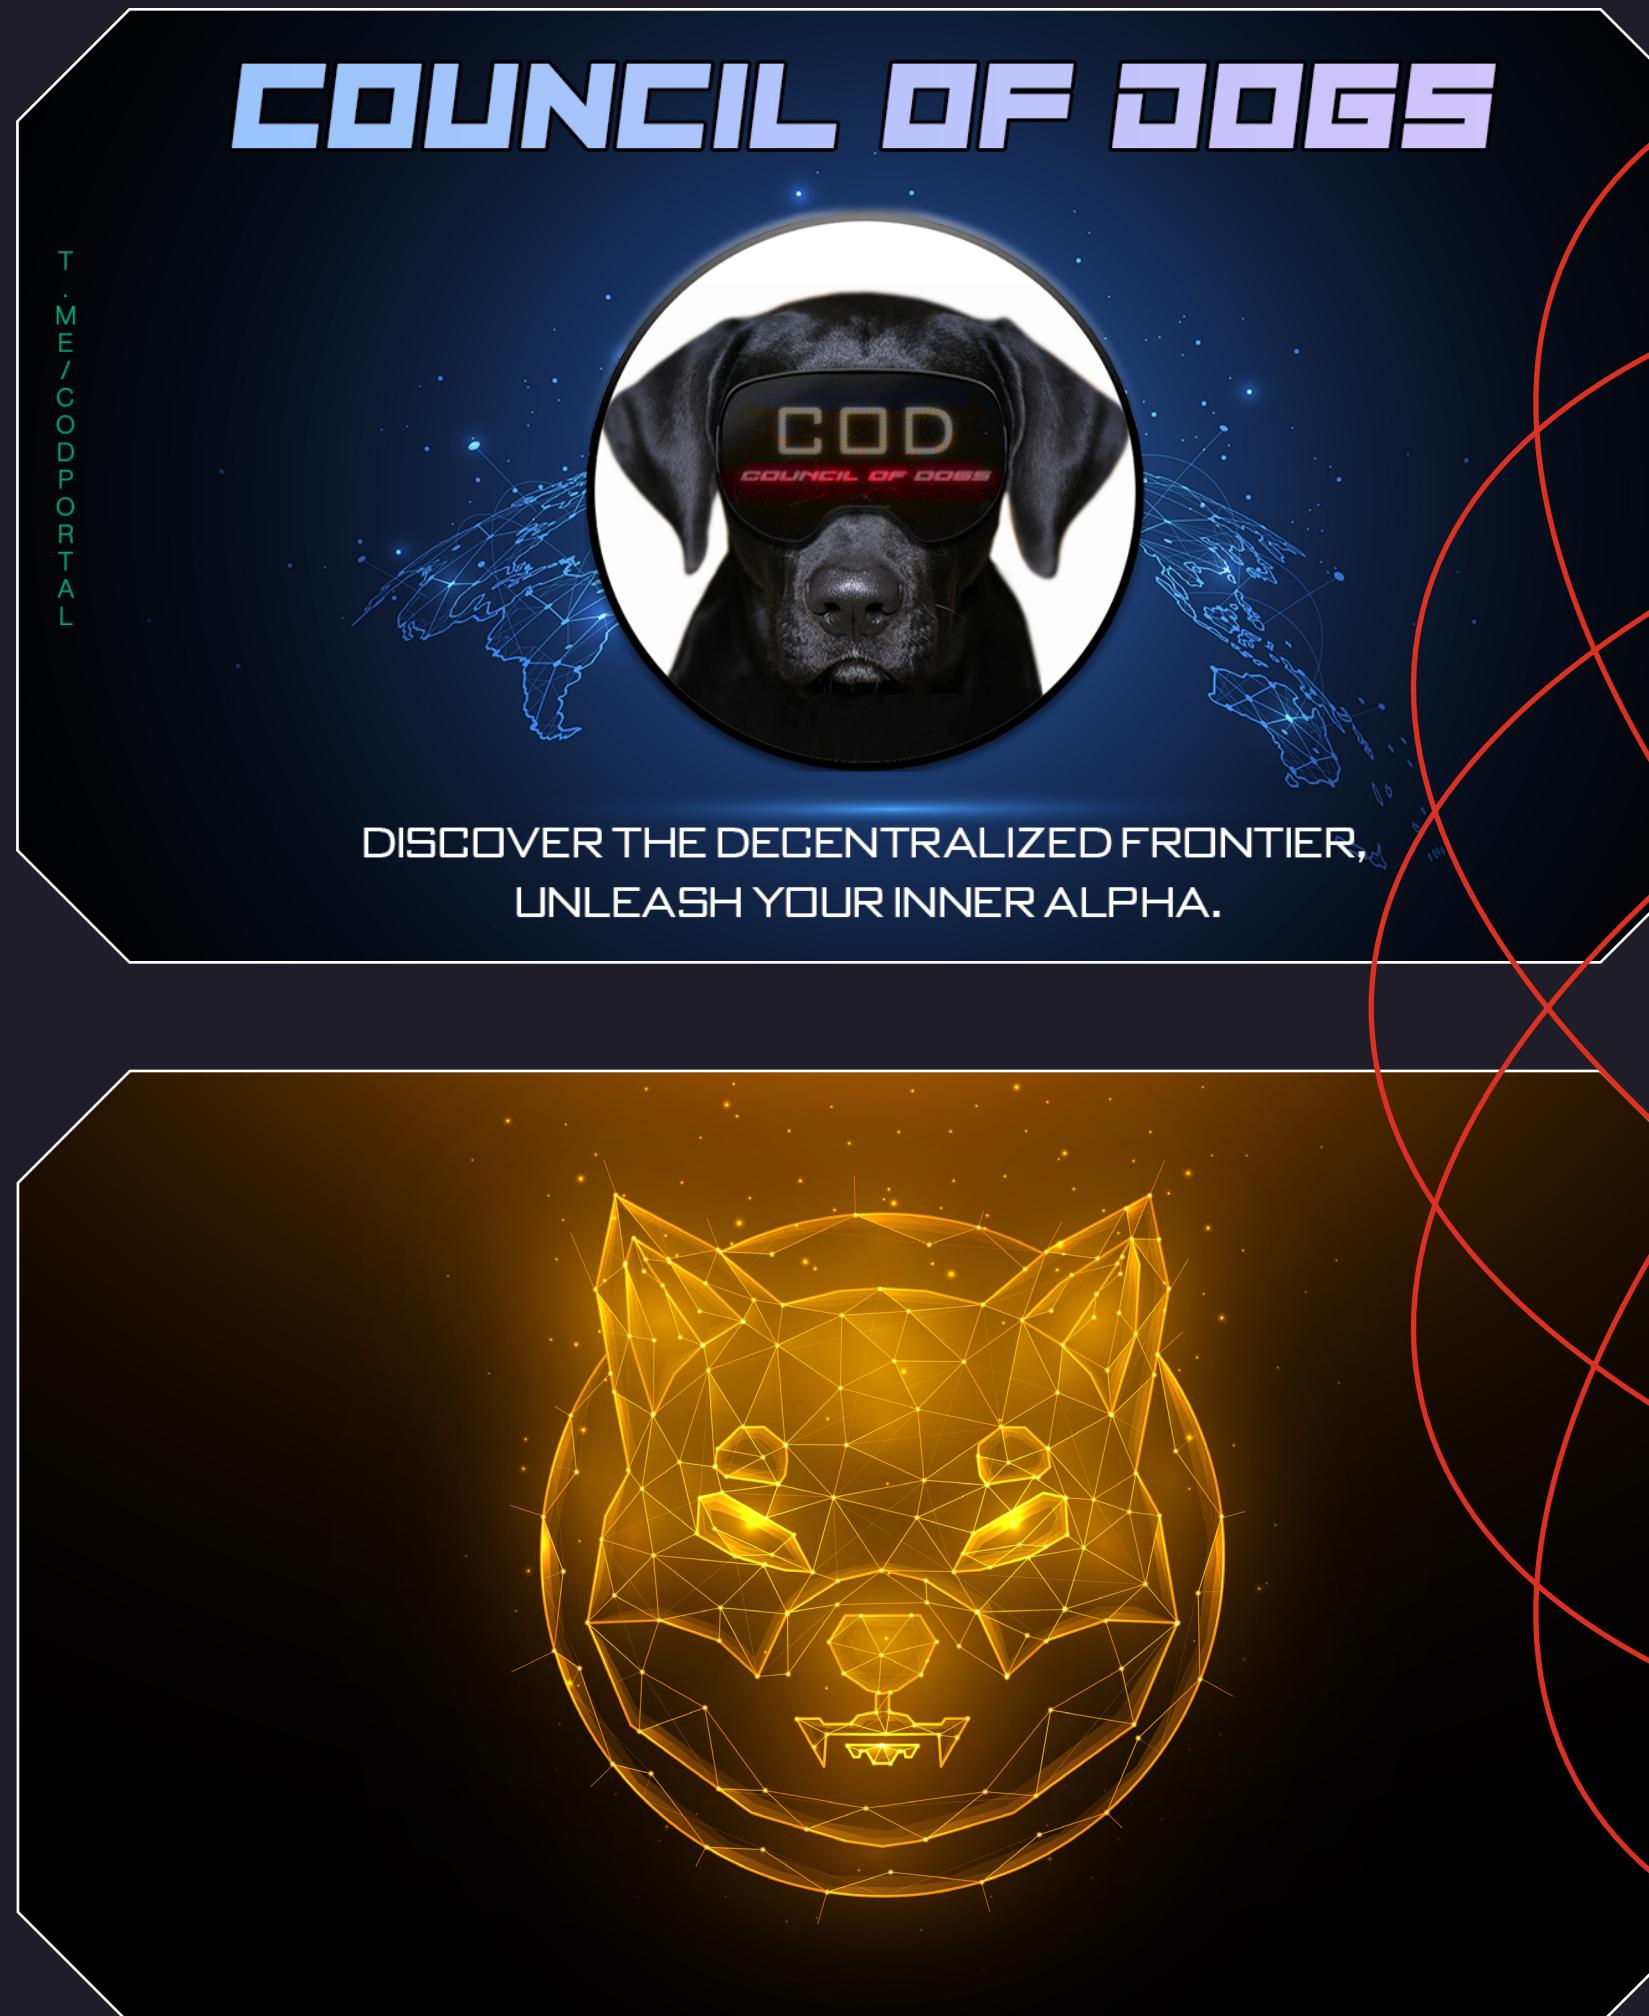

INTRODUCTION

The Council of Dogs (CoD) is a new decentralized community token built on the Ethereum network, designed to contribute to and benefit the upcoming Shibarium ecosystem.

CoD is focused on developing various utilities and offering services in exchange for CoD tokens.

The community, through the DAO, will be able to propose the direction of the funds, whether that is FaaS, investments, additional developments, or other initiatives.

PROBLEM

The upcoming Shibarium chain is a new and highly anticipated blockchain ecosystem with limited utilities and services.

Users and developers may have difficulty finding useful tools and services to contribute to the growth and success of the Shibarium ecosystem.

There may be challenges in building trust and transparency within the new blockchain ecosystem.

SOLUTION

CoD plans to provide useful utilities and services to contribute to the upcoming Shibarium ecosystem.

We aim to build trust and transparency, while partnerships with Shibarium projects create opportunities for participation.

CoD is positioning to become a significant player in the upcoming Shibarium ecosystem by leveraging its in-house development capability, partnerships, and the first democratic decision-making structure via its DAO..

COD TOKEN

The CoD token is the primary means of participation and contribution in the CoD ecosystem. CoD tokens can be used to access utilities and services provided by CoD, as well as participate in governance and decision-making through the CoD DAO.

UTILITIES

CoD offers a suite of utilities and services, such as swaps, lockers, snipers, rewards dashboards, staking pools, and DAOs, which will be deployed on the Shibarium network. CoD is capable of delivering these items and charging developers of projects in CoD for its services.

COD ECO SYSTEM

GOVERNANCE

CoD is tied to a DAO that allows for democratic and decentralized decision-making that aligns with the principles of Ryoshi's philosophy. The community, through the DAO, can propose on the direction the funds are put towards, whether that is FaaS, investments, additional developments, etc.

COMMUNITY

CoD places a strong emphasis on community, recognizing that it is a crucial aspect of success in the crypto space. The stronger the community, the more powerful a DAO can become.

Council of Dogs (CoD) token is a 0 tax token. This means that there are no fees or taxes charged on transactions involving CoD tokens. The project aims to generate revenue through other means, such as convenience fees on swaps, staking pools, and partnership fees.

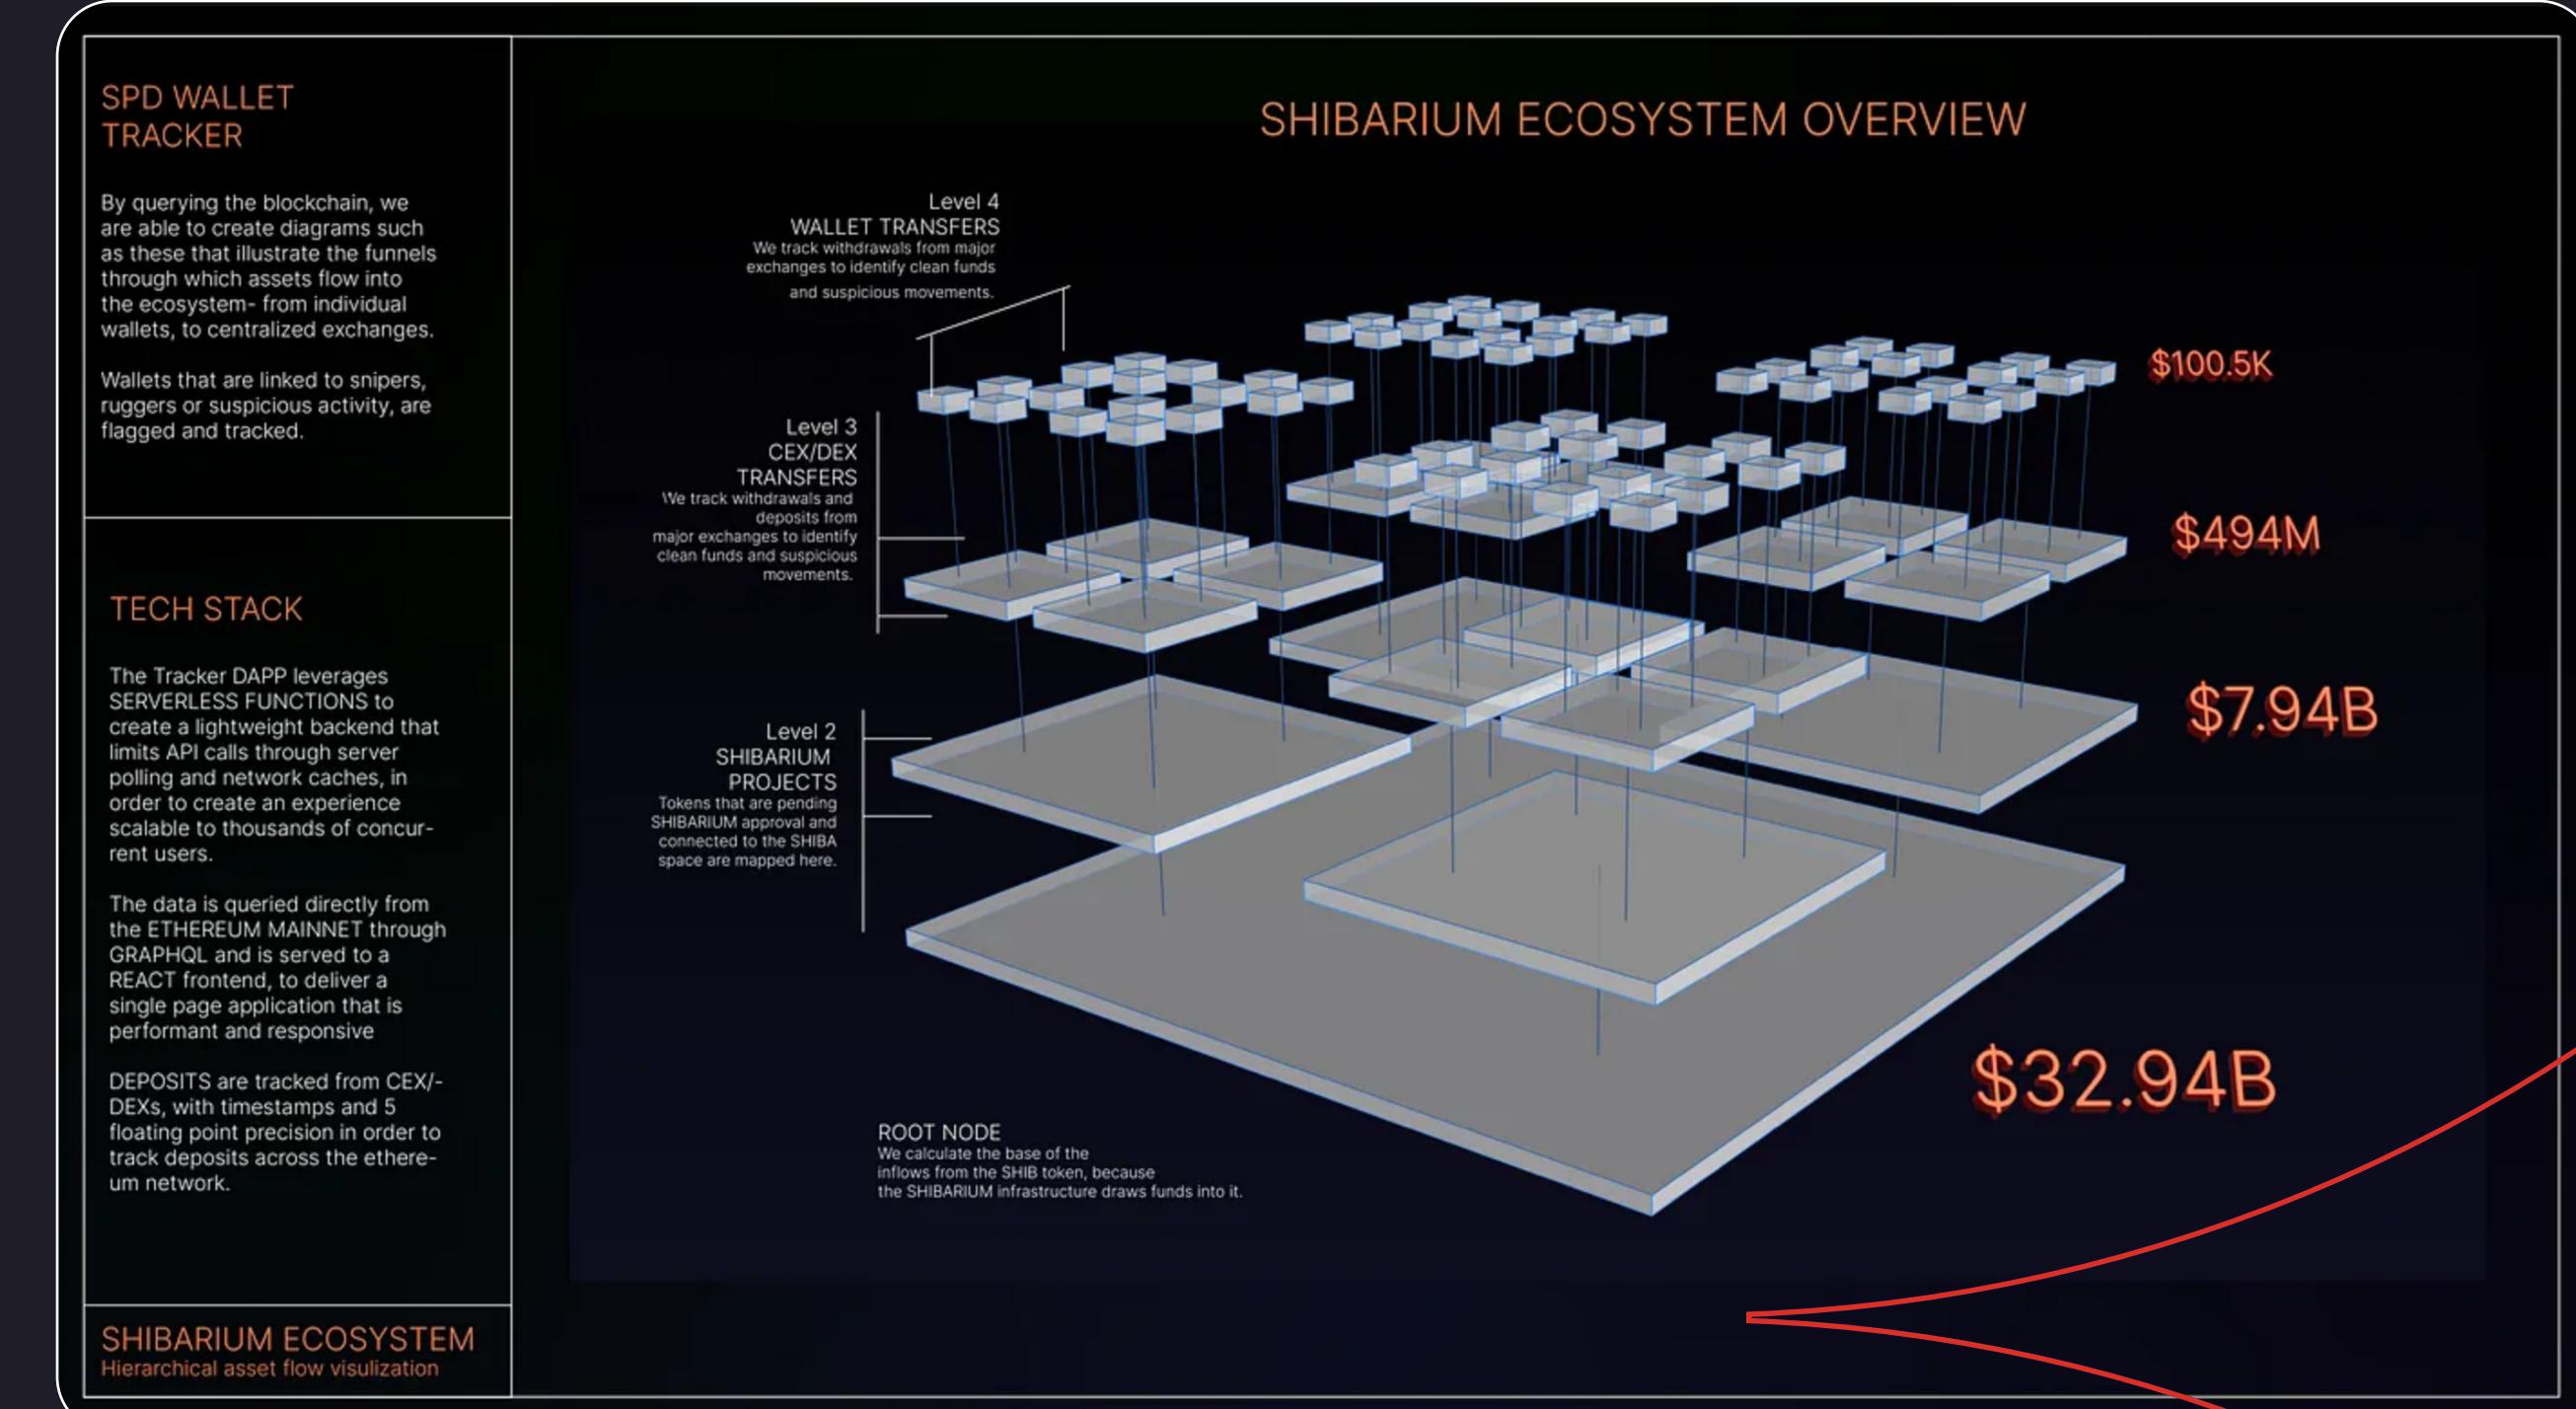

The screenshot shows the Council of Dogs (CoD) DAO interface. It includes a sidebar with 'Proposals' (New proposal, About, Settings), a 'Council of Dogs \$CoD...' section (3 members, Joined), and a 'You' section (Introducing our Decentralized Community). The main area displays three proposals:

- Pay for a mad apes call**: Status Closed, Yes 1 VOTE (100%), No 0 VOTE (0%).
- Act as intermediary to Shibarium Degeneres**: Status Closed, Yes 2 VOTE (66.67%), No 1 VOTE (33.33%).
- You**: Status Closed, Join the Pack, 1 VOTE (100%).

DEVELOPMENT

Council of Dogs (CoD) is focused on developing a suite of utilities and services for the upcoming Shibarium blockchain. These utilities and services include swaps, lockers, snipers, rewards dashboards, staking pools, and DAOs.

CoD's development efforts are also focused on creating a decentralized community that is governed by a DAO. This allows for democratic and decentralized decision-making that aligns with the principles of blockchain technology.

The interface features a dark background with a dog-themed illustration. It includes a sidebar with 'CREATE PROPOSAL', 'ONGOING PROPOSALS', 'COMPLETED PROPOSALS', 'TOKEN ANALYTICS', and 'COMMUNITY'. The main area shows a dashboard with 'TOTAL ETH' and 'TOTAL TOKENS' sections, and a central 'TOKEN ANALYTICS' section with a line graph and various metrics.

COUNCIL OF DOGS \$COD DAO + DASHBOARD

With Council of Dogs, you can easily manage your portfolio, track your tokens, and stay up-to-date with the latest developments in the Shibarium community. Join the revolution and unleash your potential with Council of Dogs.

COUNCIL OF DOGS, THE ULTIMATE DAO AND PORTFOLIO TRACKER DASHBOARD FOR SHIBARIUM. OUR POWERFUL DAPP IS NOT ONLY BUILT FOR SHIBARIUM, BUT ALSO DESIGNED TO BE USED BY OTHER PROJECTS AND TEAMS LOOKING TO OPEN A TOKEN-GATED DAO, PROPOSAL DASHBOARD, AND TOKEN TRACKER.
